Stellar Phoenix Windows Backup Recovery is a reliable software, dedicated to repairing and restoring data from damaged backup files. The software can manage.BKF files, as well as.ZIP format archives and automatically scan the backups, upon opening them. Thus, the software present a viable solution to extracting the data from a corrupted.BKF/.ZIP file. Powerful scanner and repairing application The application can handle.BKF files, but also.ZIP archives created with Windows Vista or newer. The software is designed to restore these backup files to their original state, in case they were affected by logical corruption. The application uses an advanced algorithm that allows it to automatically scan the files upon opening them. The software supports the above mentioned backup file types and it allows you to manually search for them, or set the automatic computer scan. In case you do not know the current location of the backup files, the software can search the system in order to find them. It displays all the supported file, identified during the scan, along with their paths, so you can choose the one you wish to repair. Automatic repair process The program can commence the file scanning process, as soon as you load it. Thus it can quickly identify the missing or corrupted pieces, if there are any. When the scan is finished, the repairing process is triggered. The software can display the contents of the backup file, in the main window, as well as an activity log, in the report area. You may easily restore the files contained in the corrupted backup, by saving them to a local folder or reconstructing the original document. Additionally, you may save the information gathered during the scan or the log report to.DAT, respectively.LOG files. Reliable tool for backup repair and file recovery With Stellar Phoenix Windows Backup Recovery, you can recover lost information from backup files, in the.BKF format or from archives. After repairing the selected file, the software can display the contents of the backup/archive, offering a preview for each item in the.BKF. Moreover, the file recovery process can be stopped at any time. If you wish to resume it, however, you need to start it over.
